

Guidance for Group submissions (due 11:59 PM ET, February 11<sup>th</sup>, 2021):

One person from each group should submit the pdf electronically on Sakai, following the file naming convention of the homeworks: *date\_lastname\_firstname\_[group/proposal/finalReport/presentation].pdf* (**5 points will be deducted for files named incorrectly**). You only need to use the name of the group member who is submitting on behalf of the team.

The course project will be completed in groups of 2 or 3. Please include a brief explanation in your group document explaining your experience levels and interests, and how the team is a good match. The goal is not to have a severe imbalance in skills and expertise on any team.

Turn in a ½ page document describing:

- 1) the group members first and last names
- 2) the date and time of your meetings
- 3) a brief 1 paragraph summary of the project ideas that were discussed at your initial meetings, and one or a few ideas for potential data sets you may use to answer questions about your ideas.

The group selection document will count toward 20% of your overall proposal grade.
